ABOUT ME

Motivated Artificial Intelligence student currently in the 4th semester of a BS AI program at The University of Lahore. Interested in Artificial Intelligence and Backend Development with a strong passion for building intelligent systems. Known for being hardworking, having strong leadership qualities, and effective communication and problem-solving skills.

PROJECT

University Chatbot

The University of Lahore

- Developed a University Chatbot designed to assist students by providing quick access to academic information and university updates.
- Implemented both frontend and backend components to create a complete interactive system.
- The chatbot allows students to ask queries related to schedules, academic activities, and university information through a simple conversational interface.
- Designed an admin panel where administrators can upload and manage important information such as class schedules, exam date sheets, and announcements.
- The system dynamically retrieves and delivers updated information to students, reducing the need for manual inquiries.
- Focused on improving user accessibility, automation of information delivery, and efficient communication between administration and students.
